

Major Libraries Including books/chapters Authored by Jerry Bergman PhD

The following over 2,400 major academic libraries in over 65 countries contain one or more of my books, and or books that include chapters I have authored. This list is from Worldcat and includes only college and university plus major large libraries such as the New York Public Library. In addition there are 17,468 public libraries in the US alone and several thousand probably contain copies of my books. There are 51,311 public libraries in China, 46,000 in Russia , 29,800 in India, 8,290 in Poland, 8,195 in Germany and 2.6 million total in the world. My work has been translated into 13 languages (including French, German, Italian, Spanish, Danish, Polish, Czech, Chinese, Arabic, and Swedish) that I know of, and only English versions are included in this list. If foreign language versions were included, the number would be significantly higher. This list is several years old, thus not all libraries were included, but to update the list would take several hours, time I have committed to other projects. My work has also been quoted in over 100 languages that I know of, including most major languages.

So far over 80,000 copies of the 60 books and monographs that I have authored or co-authored are in print. To put my book/monograph publications in prospective, 942 million titles were sold in 2021, and 1.7 million new books were self-published in 2021. Nielsen Bookscan reported that of these, 80% (1.36 million) sold less than 99 copies! And 96% (200,000) sold fewer than 1,000 copies, only 4% sold more than 1,000 copies and a mere 0.02% (25,000) sold more than 5,000 copies. Of my books, over half have sold more than 1,000 copies and at least 6 have sold close to, or more than, 10,000 copies. Amazon dominates the book business now, selling over 80% of all books sold in the US in 2022. A letter from Craig Froman editor of Master books/ New Leaf Press receive over 1,000 submissions each year and can accept only 20 to 25.
